

Table 1. Morphometric measurements (thickness) for the flexor tendons and ligaments for 12 ultrasonographed pairs of forelimbs at metacarpal level from Catalan Donkey breed. Measurement in mm, except for coefficient of variation, in %.

	Superficial flexor tendon	Deep flexor Tendon	Accessory ligament of the deep flexor tendon
Minimal value	1.9	2.3	3.3
Maximal value	6.7	9.5	10.5
Mean	3.6	4.7	5.7
Standard deviation	1.022	1.277	1.526
Coefficient of variation	27.70	26.82	26.67
